

EDUCATION

SINGAPORE MANAGEMENT UNIVERSITY (SMU) - Singapore

Aug 2025 - Mar 2027

Master of IT in Business (Artificial Intelligence Track)

- Teaching Assistant: Computational Thinking with Python
- Applied ML and MLOps: supervised and unsupervised learning, deep learning, and ML engineering on cloud (pipelines, containerised training, deployment, monitoring)
- Agentic AI and LLMs: agent design, tool use, evaluation, probabilistic reasoning, and reinforcement learning
- Big data and delivery: Hadoop, Spark/Databricks, SQL/NoSQL query optimisation, Agile/DevSecOps and CI/CD

MURDOCH UNIVERSITY - Murdoch, Western Australia

Jan 2018 - Dec 2019

Bachelor of Marketing & Business Law

EXPERIENCE

DATAIKU - Singapore

Aug 2026 - Feb 2027

Enterprise AI platform for building, deploying, and governing analytics, ML, and AI agents

Customer Solutions Engineer Intern

- Build reusable ML and AI demo assets on Dataiku DSS for enterprise prospects, spanning data preparation, model training, LLM agents, and webapps
- Assess the technical feasibility of customer problems, prototyping ML and agentic approaches with client teams
- Translate partner AI governance frameworks into Dataiku Govern workflows
- Support Sales Engineers in customer demos, technical workshops, enablement sessions, and pitches

ATTIX APAC - Singapore

Jul 2024 - Jul 2025

AI solutions for algorithmic trading, LLMs, and automotive

Product Manager

- Led QuantHare from concept to signed-off PoC, now used by the trading team as their order management system
- Worked directly with engineers to define APIs, data flows, and delivery plans for AI-driven features
- Evaluated algorithm performance metrics (Sharpe, Sortino, drawdown) to assess production readiness
- Partnered on LLM-backed system development, translating requirements into technical delivery milestones
- Defined a model governance and monitoring framework to support reliability, transparency, and client trust

MICROGAMING ASIA - Singapore

Mar 2021 - Apr 2024

Asian division of a leading iGaming and casino content provider

Product Manager - Games & Content (May 2022 - Apr 2024)

Project Executive (Mar 2021 - May 2022)

- Owned end-to-end game delivery, from market research and requirements through development with engineering teams to implementation for operator customers
- Represented the slot portfolio at trade shows, regional seminars, and customer meetings, recommending targeted content to expand operators' portfolios
- Provided regional market directors with performance tracking and per-market growth recommendations
- Doubled product creation speed, accelerating time-to-market across the APAC slot portfolio
- Optimised bet-setting and retention frameworks, driving +8% revenue growth and 20% higher uptake

3M - Singapore

Mar 2020 - Mar 2021

Junior Project Manager

- Implemented Jira workflows for clients (Dyson, Adidas, Parkway), improving project visibility
- Managed purchase orders, invoicing, and timesheets for a 40-person team across multi-country campaigns

PROJECTS

- [Commercial Credit Risk Pipeline - ML Scoring with LLM Adverse-Media Advisory](#)
Paired a default-risk model with an LLM advisory that reads adverse media, served through a FastAPI endpoint with drift monitoring, then rebuilt the pipeline on Dataiku DSS to compare the two approaches
- [Motorcycle Risk Prediction API - FastAPI ML Inference Service](#)
Designed a FastAPI ML inference API with input validation and versioned model loading, deployed on the cloud

CERTIFICATIONS

- | | |
|--|----------|
| • Dataiku Core Designer Certificate | Aug 2026 |
| • AWS Certified Cloud Practitioner (CCP) | Dec 2025 |
| • Certified ScrumMaster (CSM) | Jul 2025 |

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL
- **ML and AI:** scikit-learn, pandas, NumPy, deep learning (CNNs, RNNs), anomaly detection, LLM agents (OpenAI API, Dataiku LLM Mesh)
- **ML Engineering and MLOps:** Docker, Airflow, CI/CD, model registry, drift monitoring, FastAPI, Flask, Streamlit
- **Big Data and Databases:** Apache Spark (PySpark), Databricks, Hadoop, Hive, HBase, Cassandra, MySQL, MongoDB
- **Platforms and Tools:** Dataiku DSS and Govern, AWS (EC2, S3, EMR, VPC, IAM), GCP (Cloud Run), Git/GitHub, Jira, Confluence, Figma

ADDITIONAL

- **Languages:** English (Native), Hindi (Near Native), Mandarin (Conversational)
